

CV

I love to use my imagination to create new pictures. The process starts when I capture the image in my camera, and I then spend a lot of time in Photoshop to create the picture I have in my head. To be involved in the whole process is very important for me.

I like to be creative in many ways, not just in Photoshop. I enjoy making my own props by using different materials such as fabric, plastic, flowers, secondhand stuff, etc.

I really love to meet other creative people and form diverse collaborations. My dream is to continue with my exhibitions, sell my work, and give lectures to share my love of this art form.
